Sources

All published on GOV.UK under the Open Government Licence v3.0.

- MHCLG, Statutory homelessness detailed local authority tables (H-CLIC), tables A1 and TA1, quarterly.
- MHCLG, Social housing lettings in England, April 2024 to March 2025 (CORE), tables 1d and 1e.
- Regulator of Social Housing, Private registered provider social housing stock and rents in England 2024 to 2025, local authority trend tool.

Code and data dictionary: github.com/BHobbs-0/social-housing-pressure

Caveats

- Missing homelessness returns: up to about 30 councils miss a quarter. National and regional figures use MHCLG's published totals, which include estimates; council rates use only councils that reported.
- Lettings totals: council-level lettings are as published in CORE Table 1d without the national adjustment, so 2024/25 (252,917) is below MHCLG's headline estimate of about 263,000.
- Housing association stock only: the 2015 to 2025 trend excludes council-owned homes. Total social stock is available for 1 April 2024 only.
- Denominators and boundaries: supply rates use the latest household estimates; all series use April 2024 council boundaries.

HOW IT'S BUILT

01
Collect
30 official spreadsheets from MHCLG and the Regulator of Social Housing, downloaded by a Python pipeline.

02
Parse
27 quarters of homelessness tables whose layouts changed. The table layouts changed several times, so the code finds each column by checking the figures add up, not by fixed position.

03
Validate
15 years of council boundary changes harmonised to April 2024; 29 automated checks reconcile every series to published totals.

04
Model
Star schema with shared date, region and council tables; 54 DAX measures, including a percentile-based pressure index.

Python · pandas · Power Query (M) · DAX · Power BI project files (PBIP/PBIR) · Git
